Automations *I built*

AI agents that do the daily checking for the owner, across WooCommerce, Shopify and every marketplace. At peak the brand held #1 on 9–11 of 14 Amazon US money terms, watched hour by hour.

Rank Tracker 01

Hourly Amazon organic rank ticker for the US and five European markets (UK, DE, FR, ES, IT), tracking about 14 money keywords plus hero products. Captures top-10 results screenshots, flags up / down / flat moves and raises RED alerts, then sends the owner a daily rank card. A sister ticker tracks sponsored (ads) placement.

AMAZON US · UK · DE · FR · ES · IT

Daily Sales Report 02

One card a day with every channel's sales: Amazon, Walmart, Etsy, Allegro, Mercado Libre, Shopify and WooCommerce. Auto-posted to the owner's group chat daily, so nobody has to open seven dashboards.

ALL 7 SALES CHANNELS

Promos & Coupon Alarm 03

Daily promotions and coupons report across marketplaces, with an expiry alarm that flags coupons nearing expiry.

AMAZON · WALMART · SHOPIFY · WOOCOMMERCE

Stock Sync 04

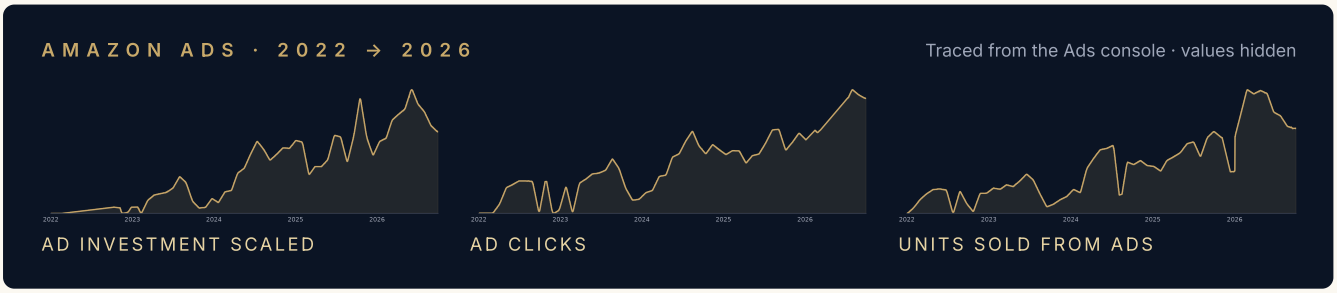

Keeps inventory aligned across channels from one source, so a sale on one storefront updates the others and nothing oversells. Plus a pixel watchdog that checks the WooCommerce store's tracking stays live.

SHOPIFY · WOOCOMMERCE · MARKETPLACES

Google AI Search Desk 05

Checks whether the brand appears in Google AI Mode and AI Overviews for “best ...” buying searches, marks each term present or absent, and lists what to fix to get cited.

Scaling an Amazon US account, *in numbers*

Health-products brand, launch in Oct 2024 through Dec 2025. Brand, products and revenue are confidential: everything is shown as an index or a percentage.

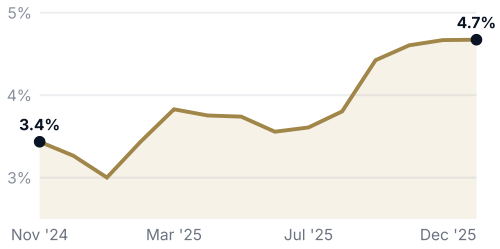

Amazon US performance (anonymized) — Business report · Nov 2024 – Dec 2025

UNITS SOLD · YOY NOV	UNITS SOLD · YOY DEC	UNITS / PAGE VIEW	FEATURED OFFER (BUY BOX)
+45%	+57%	4.7%	91–98.5%
Nov '24 → Nov '25	Dec '24 → Dec '25	from 3.4%	6 months ≥ 97%

MONTHLY UNITS SOLD · INDEX, NOV '24 = 100

UNITS PER PAGE VIEW (CONVERSION)

Results

- **About 16,600 units** sold over 15 months on **about 430K page views**
- **Conversion led the growth:** page views rose only 7–10% YoY while units rose 45–57%
- **High-five-figure** peak monthly sales
- **#1 on 9–11** of 14 core US search terms (2026)

What I did

- **Listings & SEO:** titles, bullets, backend keywords, images, variations
- **PPC & coupons:** Sponsored Products and Brands, promos timed with ad pushes
- **Buy Box & health:** compliance, appeals, pricing guardrails
- **FBA restocks** and 3PL prep to avoid stock-outs; hourly rank tracking
